### RECENT PROJECT

#### Face Visage

Face Visage detects all the faces in a picture. It takes the URL link of the picture as input and then displays all faces in the picture. It was developed using microservice architecture.

#### LawPavilion CRM SAGE

A web application that allows users to have more control of transactions carried out on SAGE Software. It gives a more detailed accounting report of the ledger, trial balance, balance sheet, profit and loss.

#### BuildSpec

A web application that allows user to discover a comprehensive range of design elements, easily communicate with brands and manufacturers, and save, share, plan and produce a realistic design prototype.
